### **DEMILEC (USA) LLC.® Receives GREENGUARD Certifications for Environmentally Friendly Spray Foam Insulation**

*EDITORS NOTE: Insulations to be featured at West Coast Green 2008 Show*

Arlington, TX — DEMILEC (USA) LLC.®'s HEATLOK SOY® spray foam insulation has received multiple GREENGUARD® certifications because of its ability to meet stringent emission standards. DEMILEC (USA), based in Arlington, TX, is an international manufacturer and distributor of spray foam insulations.

The GREENGUARD Environmental Institute (GEI) awarded its coveted GREENGUARD Indoor Air Quality Certified® and the more-stringent GREENGUARD Children and Schools<sup>SM</sup> certifications to HEATLOK SOY® because it promotes and protects indoor air quality by creating an airtight glove around the building that blocks dust, dirt and allergens from permeating the walls. Since HEATLOK SOY® and other spray foam insulations from DEMILEC (USA) never deteriorate or decompose; they also contribute to a healthy indoor environment. They also don't have high levels of emissions, which contribute to poor indoor air quality inside the structure.

HEATLOK SOY® is a closed-cell, rigid spray foam insulation that uses recycled plastic materials and soy oil to create its polyurethane base.

The insulation will be the featured product at DEMILEC (USA)'s display at the West Coast Green 2008 show in San Jose, CA on September 25-27.

DEMILEC (USA)  
West Coast Green Show New Release

To achieve GREENGUARD Certification, a product must undergo rigorous emissions testing by an independent laboratory using testing guidelines issued by GEI. GEI is an industry-independent, non-profit organization that certifies building products and materials, and sets worldwide standards for safe emissions levels.

Anyone seeking more information about DEMILEC (USA) or its products can visit [www.DemilecUSA.com](http://www.DemilecUSA.com) or call 1 (800) DEMILEC (336-4532).

“GREENGUARD Certification is an important recognition of HEATLOK SOY<sup>®</sup>’s ability to create a healthier, cleaner, quieter environment in residential and commercial buildings,” said Dave Lall, vice president and general manager of DEMILEC (USA). “This type of recognition sends an important signal to homeowners, builders and contractors that they can rely on HEATLOK SOY<sup>®</sup> to create buildings that contribute to their health and well-being, as well as to the betterment of the environment.”

DEMILEC (USA) LLC.<sup>®</sup> is a manufacturer and distributor of a line of spray foam insulation products that include environmentally friendly products and brands such as *SEALECTION*<sup>®</sup> 500, *SEALECTION Agribalance*<sup>®</sup> and HEATLOK SOY<sup>®</sup>. Following guidelines established by the US Green Building Council (USGBC), DEMILEC (USA) has developed Green spray foam insulation products that exceed the standards of the USGBC’s Leadership in Energy and Environmental Design (LEED) Green Building Rating System.
